

APRIL/MAY BEAUTY SPOT

Welcome Spring! This is what you spontaneously think when you look at the Tracy family home located at 9910 Broadview Drive. Your eyes are immediately drawn to the stunning pink tulips on the left side of the upper driveway. The tulips are abutted by a native Yucca plant.

Closer to the street in a semi-circle bed you'll find rhododendron, tall grass, domestica nandina, heuchera and baptisia. What a delight.

As you continue to enjoy all the plantings on the right side of the driveway, you'll see more signs of spring. You'll notice the brightly colored yellow and red tulips which complement our new Country Hills Garden Club Beauty Spot sign. As you linger along the front of the house, you will notice a blooming Japanese andromeda, a very large holly which frames the front of the house, and on either side of the holly you will find otto luken and skip laurel. As you continue your walk, just follow the pathway of hostas to another bed of beautiful pink tulips. This bed is surrounded by sedum, azaleas, a forsythia and a delicate yellow blooming false indigo baptisia. Plants and bushes continue all along the lower side of the house which makes the home attractive from any angle.

The stately 60+ year old Sycamore tree, which is surrounded by hostas, certainly anchors this beautiful spring blooming yard.
